NAUTICA

NAUTICAL STYLE IN EVERY ASPECT OF LIFE

Nautica, the global proponent of marine-inspired fashion now makes it easier to adapt the Nautical style in every aspect of life. It brings the naval spirit to lifestyle items and accessories and claims:

“Access music, style and power with a fashionable attitude”.

Nautica introduces a range of high-tech and fashionable audio goods. Active noise-canceling headphones, true wireless earbuds, portable Bluetooth speakers... to dive deep into the latest technology and still be chic, be Nautical.

The Nautical style calls for fashion all around, so why skip on tech accessories? With a “devil in the details” outlook on style, Nautica brings the adventurousness of high seas to the most seemingly mundane everyday items: mobile phone cases, tablet sleeves, tumblers... Bodies and techs, all wrapped in quality fashion.

Modern-day essentials are redesigned to meet modern seaside dweller's needs for tech and fashion. Power banks, wall chargers and charging cables are now more versatile in the technology and fashion senses of the word.

SMART HEALTH

BODY TRACKER SMART SCALE

NTSC01

12 essential
body metrics

8 syncs up to
eight users

PRODUCT FEATURES

- Supports up to 396 lbs (180 kg.)
- Multiple User
- Easy Setup
- LED Screen
- Kg / Lbs Unit Selection
- High Precision Sensors (Increment of 0,2 lbs / 100 g.)
- 12 Essential Body Metrics

Nautica Body Tracker

GET A WHOLISTIC VIEW OF YOUR BODY.

Not just weight, 12 metrics of body composition measured to let you know what is going on with your whole body.

BMI (Body mass index)

A BMI of 18.5 to 24.9 is considered normal for an adult while a higher BMI indicates an increased level of fat.

Body Fat Percentage

The proportion of adipose tissue in body composition.

Visceral fat

This indicates the index of fat surrounding your abdominal organs.

BMR (Basal metabolic rate)

The higher the BMR, the more calories you consume in a day and become less likely to gain weight.

Degree of obesity

A person's position on a scale of obesity based on weight control index.

Protein Mass

The total weight of protein in a person's body.

Muscle Rate

The proportion of muscle mass in the body. A high muscle rate usually indicates a lower percentage of body fat.

Body Water

The proportion of the fluids in the body composition.

Weight

The higher the BMR, the more calories you consume in a day and become less likely to gain weight.

Bone Mass

A person's position on a scale of obesity based on weight control index.

Muscle Mass

The total weight of muscles in a person's body.

Subcutaneous Fat

The percentage of the fat located just under the skin.

A person is riding an e-kick scooter on a paved path. The person is wearing dark clothing and sneakers. The background features a modern building on the left and trees on the right, all bathed in the warm, golden light of a setting or rising sun. The sun is low on the horizon, creating a strong lens flare effect. The overall mood is serene and active.
